Construction is underway for Phase One, an early phase of the Seattle Aquarium Ocean Pavilion. This early phase involves constructing the east wall and footings that the new Elliott Way will be built against, as the road heads up towards Belltown.

The new Ocean Pavilion will be a 50,000-sf structure located east of the existing Seattle Aquarium and at the base of the future Overlook Walk. The primary components will be large ecosystem exhibits with multiple viewpoints, a number of smaller exhibits associated animal care spaces, and rooftop public open space with a public elevator and stairs.
Additional Information

- There will be signs notifying of sidewalk closures at each end of the site where affected
  - During working hours only, pedestrian traffic will be directed to west side
- A flagger will be present on site to help direct trucks on and off the road to reduce effects on traffic
- The following image shows a rendering of anticipated Phase one work as well as how Turner continues to ensure the safety of its employees and the public
